

**Congress of the United States**  
**Washington, DC 20515**

March 29, 2023

The Honorable Kay Granger  
Chairwoman  
Committee on Appropriations  
Washington, DC 20515

The Honorable Rosa DeLauro  
Ranking Member  
Committee on Appropriations  
Washington, DC 20515

The Honorable Hal Rogers  
Chairman  
Subcommittee on Commerce, Justice,  
Science, and Related Agencies  
House Appropriations Committee  
Washington, D.C. 20515

The Honorable Matt Cartwright  
Ranking Member  
Subcommittee on Commerce, Justice,  
Science, and Related Agencies  
House Appropriations Committee  
Washington, D.C. 20515

Dear Chairwoman Granger and Chairman Rogers and Ranking Members DeLauro and Cartwright:

We write to respectfully request that you provide robust funding for the Digital Coast Program (Digital Coast) established by P.L. 116-223, administered by the National Oceanic and Atmospheric Administration (NOAA), in the FY 2024 Department of the Commerce, Justice, Science, and Related Agencies Appropriations Act. The Digital Coast Act (P.L. 116-223), bipartisan legislation which passed the House and Senate in 2020 by voice votes, authorized the program at \$4 million annually.

Now, more than ever, we have a great capacity to collect, analyze, and use data to create solutions to our most pressing challenges. The strong bipartisan support for this surveying, mapping, Geographic Information Systems (GIS), and geospatial data program is a demonstration of its broad appeal and value to the nation's coastal communities. By consolidating coastal data from a variety of sources in one place and making it publicly accessible, NOAA's Digital Coast Program is helping the coastal management community better plan for resilience and prepare for storms, flooding, natural disasters, and other challenges that impact vulnerable coastal communities.

Data included in the Digital Coast ranges from surveying, mapping, geospatial, economic, demographic, and ecosystem data to satellite imagery. In addition to making this data publicly available online, the Digital Coast provides a wide array of visualization and prediction tools that dramatically improve the effectiveness and efficiency of coastal management projects across the country. Benefits associated with creating and operating this program far exceed the costs and NOAA predicts a 411 percent return on investment over the next 15 years. In addition to the return on investment, the Digital Coast has played a significant role in protecting communities and natural resources from the impacts of natural disasters. Furthermore, 75 percent of users of the Digital Coast surveyed by NOAA indicated that their projects would not have been possible without the Digital Coast.

We are committed to working with our colleagues on both sides of the aisle to do everything we can to maximize the benefits of using coastal surveying, mapping, GIS, and geospatial data for our constituents and for all citizens across the country. Thank you for your attention to this request.

Sincerely,

*Earl L. "Buddy" Carter*
